

Compass Sales Solutions is Excited to Announce its 10 Year Anniversary!

Boise, ID – June, 2011 – Compass Sales Solutions, the leader in Sales Opportunity Management software is proud to announce its Ten Year Anniversary and New State of the Art Facility.

In 2000 Troy Casper, a Sales Manager at a Utah based Copier Dealership began formulating the idea of creating an all-inclusive software package. His goal was to design a simplified process for sales representatives to not only manage their accounts, but to write cost-per-print contracts from start to finish. Ten Years later, Compass Sales Solutions has become the Industry's premier contact and sales productivity solution for businesses competing in the cost-per-print market.

"The last 10 Years have been extremely rewarding and I want to thank our customers for their dedication and contribution in making Compass the industry leader", says Troy Casper, President of Compass Sales Solutions. "I would also like to recognize our exceptional Support, Training and Sales staff who offer over 100 years of combined industry experience."

With over 4500 satisfied users across 5 countries it was clear that Compass had outgrown its location in Eagle, ID and is pleased to announce its new location in Garden City, ID. George Gallian, CEO of Compass Sales Solutions says, "We chose this new facility with growth in mind. The new, much larger location offers a state of the art conference and training center overlooking the river and golf course."

Compass Sales Solutions and its employees look forward to the future and continuing to be "Your Guide to Sales Success!"
